## ABOUT

Originally launched in 2006, M/Y GINGER is a well-maintained example of Pershing's high-performance 115 model. Following a full refit at the Dunya Yachts facility in Turkey, the yacht has been extensively upgraded - complete repaint of the hull and superstructure, new exterior upholstery and deck furniture, installation of aft underwater lights, replacement of all carpets, interior upholstery and leatherwork, and the integration of a new entertainment system. Her engines and all associated systems and machinery were fully overhauled, offering a rare opportunity to acquire a fully updated version of this model.

She retains her original design features—sleek exterior lines, multiple deck areas, and a modern interior—with upgraded electronics and a top speed of 35 knots.

From the aft deck seating to the foredeck sunpads, providing both privacy at the dock and airflow while at anchor, M/Y GINGER was built with outdoor use in mind. The sundeck features four fixed sun loungers. The new teak dining table on the aft deck provides a setting for open-air meals. For smaller or more private gatherings, the foredeck dining area offers additional seating and views.

The main saloon is arranged with a sofa on the port side and Eames chairs to starboard. Finishes include oak flooring, a black horsehair deckhead, grey sycamore blinds, and carbon fibre detailing. A TV is mounted in a divider forward of the saloon, behind which lies the helm station. The lower saloon has been redesigned as a media and cinema room, featuring a woven leather aft bulkhead and natural fibre carpeting.

Located amidships, the full-beam master suite includes his-and-hers bathrooms, seating areas, and a high-spec entertainment system. Vertical hull windows provide natural light and a direct view of the sea at speed.

The VIP cabin is forward and features an angled double bed, walk-in wardrobe, curved seating, and an en suite bathroom. A second guest cabin includes an en suite and both a standard berth and a Pullman berth.

M/Y GINGER's entertainment systems were fully replaced during the refit. A 60-inch screen drops down in the main saloon, while the lower media room features a 65-inch 3D TV. The Apple TV system runs on a Crestron backbone and is controlled via iPad Minis. Exterior entertainment systems were also upgraded, with new speakers and TVs installed.

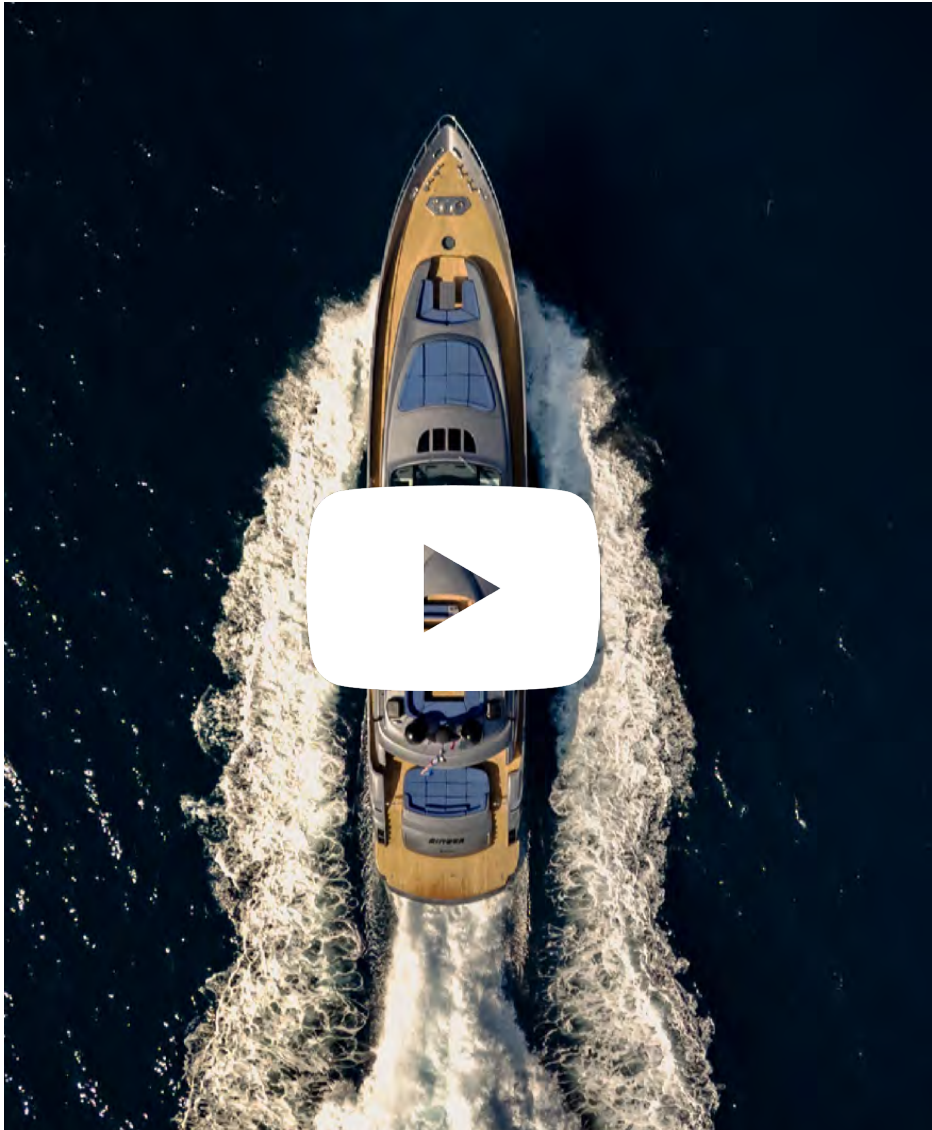

Completing the package, she is offered with a Williams 445 Jet tender. Her performance and comprehensive upgrades make M/Y GINGER stand out as one of the finest examples of the Pershing 115 on the market today.

## KEY FEATURES

- Entirely refitted in 2024, including full paint and many upgrades
- 4 x Zero speed stabilizers (Mitsubishi Gyros)
- Amazing top speed of 35 knots
- RINA Class survey completed and up-to-date
- Low engine hours, MTU QL3 done, and 2 new Kohler generators (2024)
